Art Unit: 2177

#### **DETAILED ACTION**

1. Claims 1-9 are pending in the present application. Claims 1-9 have been amended by preliminary amendment filed December 10, 2001.

#### **Drawings**

2. The drawings are objected to because figures 8a, 8b and 8c include partial views. Note MPEP 37 CFR 1.84(h). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### Specification

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Art Unit: 2177

4. The abstract of the disclosure is objected to because its length exceeds 150 words. Correction is required. See MPEP § 608.01(b).

#### Claim Rejections - 35 USC § 112

- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the addresses" in line 8. There is insufficient antecedent basis for this limitation in the claim.

Claims 2-9 are rejected based on dependency.

## Allowable Subject Matter

- 7. Claims 1-9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
- 8. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach the method of recovering a database provided with disk back-up by reconstructing the remembered set as claimed in independent claim 1. Also the prior art does not teach in the area of

Art Unit: 2177

the first generation, periodically collecting live memory cells as a new mature generation as cited.

#### Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Daniels et al. US Patent 5,278,982

Kozakura US patent 5,724,581

Garthwaite US Patent 6,424,977 B1

McEntree et al. US Patent 4,797,810

Screenivas et al. Garbage Collection in Message Passing Distributed
Systems

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Greta L. Robinson whose telephone number is (703) 308-7565. The examiner can normally be reached on Mon.-Fri. 9:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John E. Breene can be reached on (703) 305-9790. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
